Summary

Highly skilled and results-driven Senior Fullstack Developer with over 8 years of experience in developing robust web applications. Proficient in Node.js, React, and Angular, with a strong understanding of modern web development frameworks and tools. Demonstrated expertise in creating scalable and maintainable code solutions that meet client requirements. Proven ability to lead and collaborate with cross-functional teams to deliver high-quality software products. Committed to staying updated with the latest industry trends and continuously improving development practices.

Experience

Senior Full-stack Developer

Systango

Apr 2020 - Apr 2023 (3 years 1 month)

- Led a team of developers in designing and implementing a scalable web application using Node.js, React, and Redux, resulting in a 30% increase in user engagement and a 20% improvement in page load times.
- Collaborated closely with product managers and designers to gather requirements and translate them into technical specifications, ensuring the successful implementation of new features and enhancements.
- Mentored and guided junior developers, fostering a collaborative and knowledge-sharing environment that improved team productivity and performance.
- Conducted thorough code reviews, enforced best practices, and implemented coding standards to ensure high code quality, maintainability, and adherence to industry standards.
- Implemented continuous integration and deployment processes using tools like Jenkins and Docker, streamlining the development and release cycles.
- Developed RESTful APIs and integrated third-party services, enabling seamless data exchange and enhancing overall system functionality and user experience.
- Worked closely with cross-functional teams to troubleshoot and resolve complex technical issues, ensuring the smooth operation of critical systems and minimizing downtime.
- Implemented automated testing using Jest and Enzyme, significantly reducing the number of bugs and improving software quality.
- Collaborated with UI/UX designers to implement responsive designs, optimize front-end performance, and deliver intuitive user interfaces.
- Contributed to system architecture decisions, performance optimizations, and scalability planning to meet growing user demands.

Full Stack Developer

Cloud Academy

Feb 2016 - Mar 2020 (4 years 2 months)

- Developed and maintained feature-rich web applications using Angular and Node.js, resulting in a 40% reduction in application downtime and improved user satisfaction.

- Collaborated closely with stakeholders to gather and analyze requirements, translating them into technical solutions and ensuring alignment with business objectives.
- Integrated third-party APIs and developed RESTful services, enabling seamless data integration and expanding application capabilities.
- Implemented responsive UI designs and optimized front-end performance, resulting in enhanced user experience and increased engagement.
- Conducted comprehensive unit and integration testing, identifying and resolving critical bugs and ensuring high-quality software releases.
- Worked closely with database administrators to optimize query performance, improve data retrieval times, and ensure system scalability.
- Collaborated with cross-functional teams, including designers and QA engineers, to ensure timely delivery of project milestones and successful software launches.
- Actively participated in code reviews, providing constructive feedback and enforcing coding standards to maintain code quality and consistency.
- Investigated and resolved complex technical issues, improving system stability and minimizing user disruptions.
- Implemented logging and monitoring solutions to proactively identify and address potential system issues.

Frontend Developer

ASBIS

Oct 2013 - Jan 2016 (2 years 4 months)

- Developed and maintained a real-time messaging platform using Angular, Node.js, and Socket.io, significantly improving communication and collaboration among users.
- Implemented automated testing processes, resulting in a 40% reduction in the number of bugs and ensuring high-quality software releases.
- Designed and optimized database schemas to improve data retrieval times, scalability, and overall system performance.
- Conducted regular code refactoring and performance tuning, enhancing application speed, responsiveness, and user satisfaction.
- Collaborated closely with product owners to prioritize and implement new features and functionalities, resulting in increased user engagement and customer satisfaction.
- Integrated third-party APIs and services, expanding the platform's capabilities and providing seamless data exchange with external systems.
- Actively participated in Agile development methodologies, including daily stand-ups, sprint planning, and retrospectives, to ensure efficient project management and continuous improvement.
- Worked closely with UI/UX designers to implement visually appealing and intuitive user interfaces, improving overall user experience.
- Collaborated with cross-functional teams, including QA engineers and system administrators, to ensure the smooth operation and stability of critical systems.
- Kept abreast of the latest industry trends, technologies, and best practices, incorporating them into development processes and suggesting innovative solutions to improve system performance and functionality.

Education

University of Tartu Institute of Computer Science

Bachelor's degree, Computer Science

Aug 2009 - Apr 2013

Skills

JavaScript • TypeScript • React.js • AngularJS • Node.js • Express.js • MongoDB • MySQL • PostgreSQL • Amazon Web Services (AWS)
