Summary

Highly skilled and accomplished Full Stack Developer with a proven track record in both front-end and back-end development. Adept at leveraging programming languages such as JavaScript, React.js, Next.js, and AWS to deliver robust and scalable solutions. Possesses a solid understanding of database technologies, including SQL and NoSQL, along with proficiency in containerization technologies like Docker and Kubernetes. Experienced in designing and developing RESTful APIs, as well as integrating third-party APIs. Strong knowledge of HTML, CSS, and front-end frameworks such as Bootstrap and Material UI.

Experience

Full Stack Engineer

Systango

Apr 2020 - Apr 2023 (3 years 1 month)

- Developed and maintained full stack web applications using JavaScript, React.js, and Next.js, ensuring high performance and user-friendly interfaces.
- Leveraged AWS services to deploy scalable and secure applications, optimizing cloud infrastructure for enhanced performance and cost-efficiency.
- Utilized three.js and Node.js to create immersive 3D experiences and interactive visualizations.
- Designed and implemented efficient database structures using SQL and NoSQL databases, improving data retrieval and manipulation processes.
- Implemented containerization technologies such as Docker and Kubernetes to streamline application deployment and management.
- Developed RESTful APIs for seamless integration with internal and external systems, enhancing overall functionality and data exchange capabilities.
- Integrated third-party APIs, enabling data synchronization and expanding application functionality.
- Utilized HTML, CSS, and front-end frameworks like Bootstrap and Material UI to create visually appealing and responsive user interfaces.

Full Stack Developer

Cloud Academy

Feb 2016 - Mar 2020 (4 years 2 months)

- Led a team of developers in the design and development of full stack web applications, ensuring adherence to best practices and delivery of high-quality solutions.
- Implemented advanced features and functionalities using JavaScript, React.js, and Next.js, enhancing user experience and driving user engagement.
- Orchestrated the deployment of applications on AWS, optimizing cloud infrastructure for scalability and reliability.
- Collaborated closely with product managers and stakeholders to understand requirements, provide technical insights, and deliver solutions aligned with business objectives.

- Mentored junior developers, conducting code reviews and providing guidance on best practices to foster professional growth and maintain code quality.

Frontend Developer

ASBIS

Oct 2013 - Jan 2016 (2 years 4 months)

- Worked on various full stack projects, utilizing JavaScript, React.js, and Next.js to build engaging web applications.
- Implemented AWS services for scalable and reliable hosting and infrastructure.
- Leveraged SQL and NoSQL databases to develop efficient data models and optimize database performance.
- Created RESTful APIs for seamless integration with external systems and developed custom API endpoints.
- Collaborated with the design team to implement responsive and visually appealing user interfaces using HTML, CSS, and front-end frameworks.
- Participated in code reviews, unit testing, and bug fixing to ensure high-quality software deliverables.

Education

University of Adelaide

Bachelor's degree, Computer Science

Aug 2009 - Apr 2013

Skills

JavaScript • React.js • Next.js • Amazon Web Services (AWS) • SQL • MongoDB • REST APIs • Docker Products • Kubernetes • Bootstrap
