Summary

Results-oriented Senior Full Stack Developer with over 8 years of experience in building robust and scalable web applications. Proficient in Node, Python, React, and Vue.js, with a strong understanding of software development principles and best practices. Adept at collaborating with cross-functional teams to deliver high-quality solutions that meet client requirements. Demonstrated ability to analyze complex problems, propose innovative solutions, and consistently meet project deadlines. Committed to staying updated with the latest technologies and continuously enhancing skills to drive organizational success.

Experience

Full Stack Engineer

Systango

Apr 2020 - Apr 2023 (3 years 1 month)

- Developed and maintained responsive web applications using Node, Python, React, and Vue.js, resulting in a 30% increase in user engagement and improved overall user experience.
- Collaborated closely with UI/UX designers and backend developers to ensure seamless integration and optimal performance of front-end components.
- Implemented RESTful APIs and integrated third-party services, optimizing data flow and enhancing system functionality.
- Conducted regular code reviews and performed extensive testing to identify and resolve software defects, resulting in a 20% reduction in application bugs.
- Contributed to architectural decisions and provided technical guidance to junior developers, fostering a collaborative and productive work environment.
- Actively participated in Agile development processes, attending daily stand-ups, sprint planning, and retrospective meetings.
- Utilized Git for version control, ensuring efficient collaboration and codebase management.
- Integrated automated testing frameworks such as PHPUnit and Jest to ensure application stability and reliability.
- Collaborated with stakeholders to gather requirements, provide estimates, and deliver solutions aligned with business objectives.
- Actively researched and implemented best practices to optimize application performance and maintain code quality.

Full Stack Developer

Cloud Academy

Feb 2016 - Mar 2020 (4 years 2 months)

- Led the development of a large-scale e-commerce platform using Node, Python and React, which resulted in a 40% increase in sales within six months of launch.
- Implemented a scalable and efficient database structure, improving query performance and reducing page load times by 25%.

- Integrated payment gateways and shipping APIs, ensuring seamless transactions and accurate order tracking for customers.
- Collaborated with product owners and stakeholders to gather requirements, provide estimates, and deliver solutions aligned with business objectives.
- Mentored junior developers, conducting knowledge-sharing sessions and fostering their growth within the team.
- Implemented authentication and authorization systems to ensure secure access to sensitive information and maintain data integrity.
- Conducted performance optimizations, including code refactoring and database query optimizations, resulting in a 20% improvement in application speed.
- Actively participated in Agile development processes, attending daily stand-ups, sprint planning, and retrospective meetings.
- Utilized Git for version control, ensuring efficient collaboration and codebase management.
- Integrated automated testing frameworks such as PHPUnit and Jest to ensure application stability and reliability.

Frontend Developer

ASBIS

Oct 2013 - Jan 2016 (2 years 4 months)

- Developed and maintained a custom CRM system using PHP and Vue.js, enabling streamlined communication and improved customer relationship management.
- Implemented real-time data synchronization between the web application and backend services, ensuring accurate and up-to-date information for users.
- Optimized front-end performance by implementing lazy loading and code splitting techniques, resulting in a 30% reduction in page load times.
- Collaborated with QA teams to identify and fix software defects, maintaining a high level of application quality.
- Actively participated in Agile development processes, attending daily stand-ups, sprint planning, and retrospective meetings.
- Utilized Git for version control, ensuring efficient collaboration and codebase management.
- Integrated automated testing frameworks such as PHPUnit and Jest to ensure application stability and reliability.
- Collaborated with stakeholders to gather requirements, provide estimates, and deliver solutions aligned with business objectives.

Education

University of Adelaide

Bachelor's degree, Computer Science

Aug 2009 - Apr 2013

Skills

Node.js • React.js • Vue.js • PostgreSQL • Git • Agile Methodologies • GraphQL • Python (Programming Language) • Django • MongoDB
